

Project Manager Aviation (m/f/d)

SST Flugtechnik GmbH is a Part 21J Design Organization, based at the Allgäu Airport in Memmingerberg and providing extensive experience in aircraft design and certification to in-house and external aircraft programs.

- Development and certification of new products and Supplemental Type Certificates (STCs)
- Design of changes and repairs
- Mission system integration
- Continued Airworthiness for Type Design

Location: Memmingerberg, Germany

Start date: Immediately

Your future:

- Overall leadership, direction and guidance of all facets of your assigned projects
- Responsibility for the communication, cost, schedule and technical performance of your project team to ensure successful project execution incl. definition and monitoring of KPIs
- Resolving of conflicts, demands and priorities on assigned projects
- Work on unplanned project issues to a best solution, including development of plans-forward, escalation and increased resources, as required
- Effective communication of project statuses to executive board and director of engineering
- For supplier project management, responsibilities will focus on managing the cost, schedule and technical performance of key vendors
- Coordination with internal and external partners
- Working on ad hoc related tasks

Your qualifications:

- University degree M.Sc./Dipl. (TU/FH) in Aerospace Engineering, Mechanical Engineering or equivalent
- Minimum 5 years of experience in aerospace industry
- Demonstrated track record of successfully leading engineering, development, test and certification related projects with respect to cost, schedule and technical performance
- Experience working and managing multiple stakeholders' relationships with engineering, 21J, 21G, Part 145 organisations and quality departments
- Advanced experience in special mission development and integration projects is a plus
- Experience in selecting/managing vendors, generating SOWs and evaluating proposals
- Responsible, flexible and proactive person, who is able to work independently or in a team
- Well-structured and target-oriented way of working with good conceptual and analytic problem-solving skills
- Fluent English language skills (spoken and written), German language beneficial

We offer:

- Exciting and varying tasks
- Flat hierarchies in a flexible work environment and short communication paths
- Dynamic and dedicated team
- Further training opportunities

Application:

If you are interested in this challenging position, please send your application in English to the mentioned contact person stating desired salary and earliest start date.

We are looking forward to receiving your application.
