Key Features

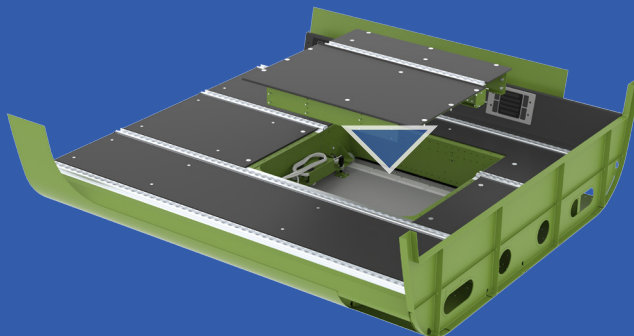

- ▶ Fuselage hatch
- ▶ Mission system interface panel
- ▶ GPS antenna for mission system
- ▶ Floor closure panel (optional)

Customizable

- ▶ Adapter plates
- ▶ Sensor installation
- ▶ Operator console

Compatible with (among others)

- ▶ Geosystem aerial scanner
- ▶ Leica aerial scanner
- ▶ 12" EO/IR camera in lift system

In combination with the robust design, short strip/unpaved runway capabilities, and versatility of the Kodiak 100, this STC provides a perfect platform for cartography, aerial scanning and photography or other special mission applications. The low operational costs and the high-mounted engine exhausts, which do not contaminate the belly-mounted equipment, outperform other competitors.
